

PotPerch™ Move – Installation and Use Instructions

PotPerch is 3D-printed using polylactic acid and certain other materials. As a new product, it is subject to risks that may emerge and evolve over time.

Please read carefully and follow all instructions accompanying your PotPerch to ensure its safe and correct installation, use, and maintenance. Failure to follow these instructions could result in a failure of your PotPerch and damage to surfaces, walls, floors, and other items.

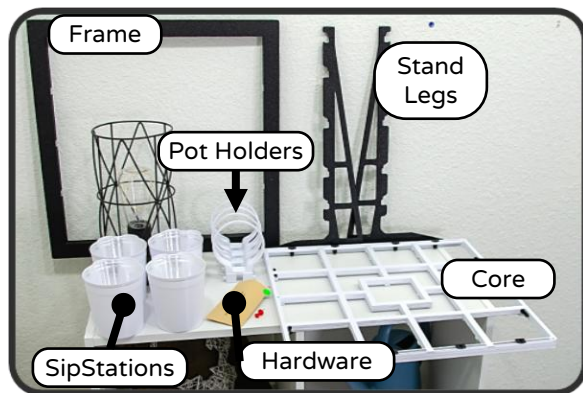

No wall? No problem.

Your PotPerch can now be set up on a stable, level, indoor surface. Wall mounting is now optional!

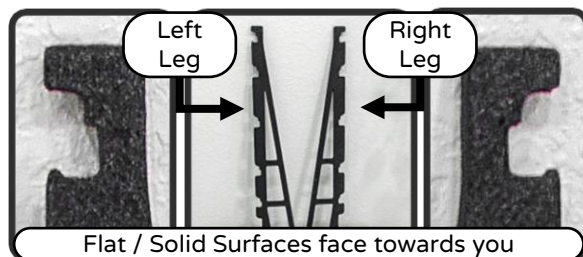

We recommend watching the PotPerch Move Installation Video before beginning this process.

Getting Ready

1. Find a clear, flat area to work in. Unpack your PotPerch Sprout components and the two Stand Legs.

2. Identify the Left Stand Leg and Right Stand Leg.

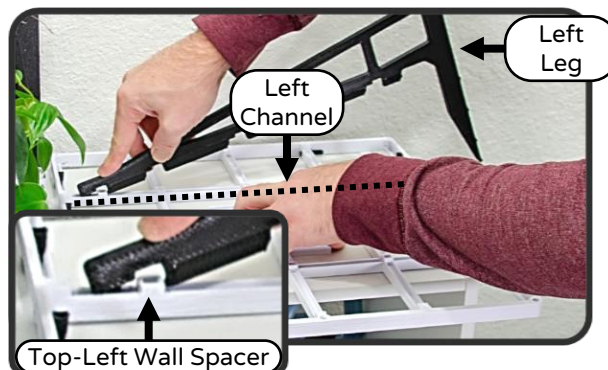

Install the Left Stand Leg

1. Turn the Core over so that the front down and the back up. Carefully place the Front of Core on the flat surface. Hold the Core securely. *Tip: The front-left side will now be on your right!*

2. Pick up the Left Stand Leg. Slide the top corner of the Left Stand Leg into the top of the Left Channel on the back of the Core.

3. Gently push the Left Stand Leg forward while slowly rotating it downward. The top of the Stand Leg should begin to grip the Top-Left Wall Spacer.

Cautions:

Weight Limits: Do not exceed the maximum weight stated for your PotPerch, including water, wet soil, and fully grown plants.

- 15.75"/40 cm PotPerch:
 - Max Capacity: 8 lb (3.6 kg)
 - No single pot should exceed 2lbs (0.9kg)

Freestanding use: Use PotPerch Move only on a stable, level indoor surface that fully supports both Stand Legs. Keep PotPerch away from locations where it may be easily bumped, pulled, or tipped.

Choking Hazard: PotPerch is not a toy and contains small parts. Please keep it out of reach of young children.

Do not climb/hang on you PotPerch. Your PotPerch is not a climbing frame.

Correct Attachment: Failure to use the correct installation methods will damage your PotPerch, and may result in damage to surfaces and items near you PotPerch.

For indoor use only: The use of environmentally friendly materials means the ideal temperature range for your PotPerch is 68°F - 77°F (20°C - 25°C). Avoid the cold and heat from direct sunlight, space heaters, fire places, etc. that exceed this temperature range.

Keep away from fire: The use of environmentally friendly materials means you PotPerch can catch fire. Do not place open flames within 12" (30 cm) of you PotPerch. Avoid high temperatures.

Water egress: Do not overfill your Containers. Watch the float when adding water. The Containers allow water to escape when overfilled, which protects your plants. Do not leave or place Containers on or above wood or other surfaces susceptible to water.

NOT dishwashers safe: Do not put your SipStation or other parts of your PotPerch in the dish washer. Wash parts by hand using hand soap and water then allow them to air dry.

Allergens / Latex: Your PotPerch and SipStations are not known to contain latex or toxic materials.

Growing food: When growing plants for consumption, consider using a food-safe, secondary liner inside the lift-and-swap insert.

Questions or Feedback?

We are eager to hear from you. If you have any questions about installation, use, and maintenance of your PotPerch, please contact support@verdantville.com

EXCEPT AS REQUIRED BY LAW, YOUR POTPERCH AND ALL ACCOMPANYING MATERIALS ARE PROVIDED "AS IS" AND "WITH ALL FAULTS." PotPerch™ Move – Installation and Use Instructions

4. Continue rotating the Left Stand Leg downward until the bottom of the Leg connects with the bottom-left Wall Spacer.

5. Using two hands, securely hold the top and bottom of the Left Channel in the Core and the top and bottom of the Left Stand Leg. Gently squeeze the two parts together. You should hear or feel a quiet click when the Core and Left Stand Leg fully connect.

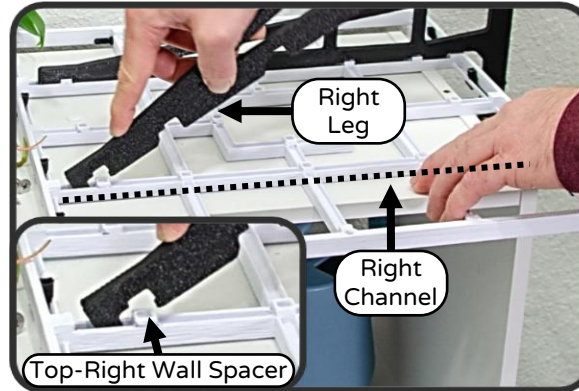

6. Holding the Core down, gently pull the Left Stand Leg away from the back of the Core to check the connection. The Leg should remain firmly attached and should not disengage.

7. If the Left Stand Leg moves or disengages, remove it from the Left Channel and repeat the Left Stand Leg installation steps.

Install the Right Stand Leg

1. Pick up the Right Stand Leg. Slide the top corner of the Right Stand Leg into the top of the Right Channel on the back of the Core.

2. Gently push the Right Stand Leg forward while slowly rotating it downward. The top of the Stand Leg should begin to grip the top-right Wall Spacer.

3. Continue rotating the Right Stand Leg downward until the bottom of the Leg connects with the bottom-right Wall Spacer.

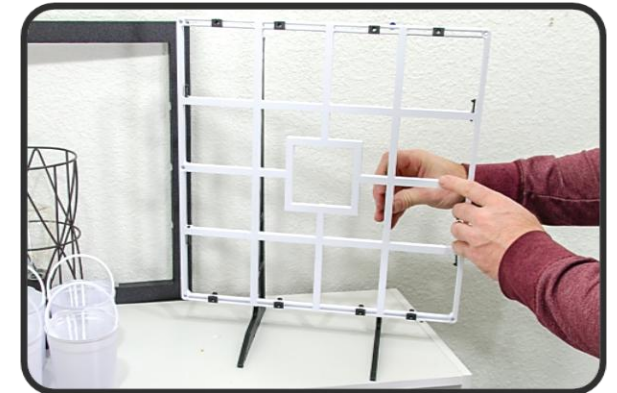

4. Using two hands, securely hold the top and bottom of the Right Channel in the Core and the top and bottom of the Right Stand Leg. Gently squeeze the two parts together. You should hear or feel a quiet click when the Core and Right Stand Leg fully connect.

5. Holding the Core down, gently pull the Right Stand Leg away from the back of the Core to check the connection. The Leg should remain firmly attached and should not disengage.

Checking and reloading your PotPerch Move

1. Place both Stand Legs on a stable, level indoor surface. Confirm that both Stand Legs remain firmly attached and rest evenly on the surface. Hold the Core with one hand and gently pull each leg away from the Core with the other hand.

2. Slide the Frame onto the Core. Ensure the top of the Core and Frame are aligned.

Instructions continue on the next page.

PotPerch™ Move – Installation and Use Instructions

3. Remove the Pot Holder Clips from a Pot Holder Ring. Keep the Left and Right Clips separate for easy installation.

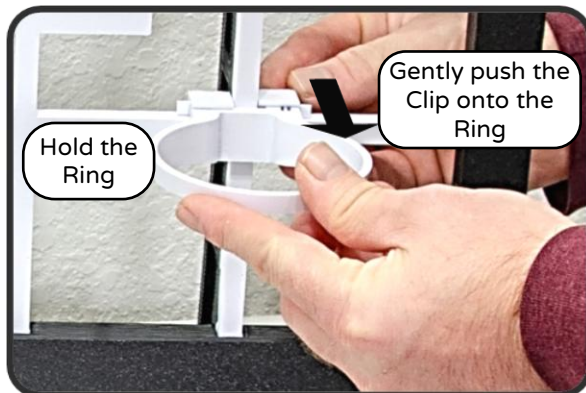

4. Install the Pot Holders.

5. Reach behind the Core. Rotate the first Clip (left or right) so that the Clip Prongs are pointing towards the front of the Core.

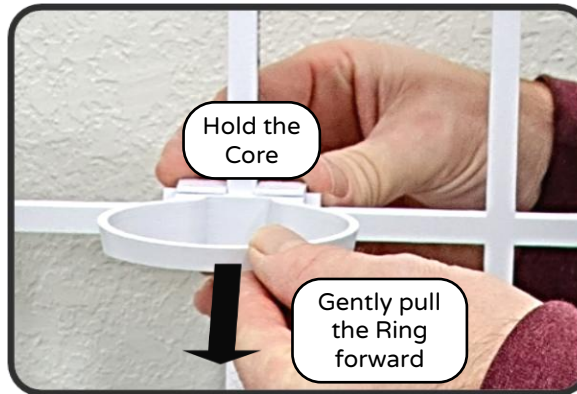

6. Gently push the Pot Holder Ring onto the Clip. Ensure the Clip Prongs align with the holes in the back of the Ring.

7. Reach behind the Core again. Gently push the second Clip (left or right) onto the Pot Holder Ring. Ensure the Clip Prongs align with the holes in the back of the Ring.

8. Check each Ring is secured. Hold the Core and gently pull the front of the Ring away from the Core with your other hand. If the Ring is installed correctly, the Clips will hold the Ring in place.

9. Once all the Pot Holders are installed correctly, gently place an empty SipStation into the Pot Holder. It is easier to start with the bottom Pot Holders, and work upwards.

10. Once the SipStation is stable, check the Ring is still retained by the Clips.

11. Hold the bottom SipStation and gently insert the Lift-and-Swap Insert holding your plant. Check the cotton wicks are pointing down and do not catch on the inside of the SipStation.

12. Gradually let go of the SipStation. If the Ring is installed correctly, your plant will now hang from the Core.

13. Repeat the Pot Holder installation steps for any remaining Pot Holders and SipStations.

14. Follow the applicable PotPerch Sprout setup and weight guidance. Do not exceed the maximum total or single-pot weight limit for your PotPerch Sprout model, including water, wet soil, and fully grown plants.

15. Before removing Pot Holders or Stand Legs, remove all plants, Lift-and-Swap Inserts, and SipStations. Then reverse the applicable installation steps.

16. Congratulations. Your PotPerch is now ready to move!

Instructions continue on the next page.

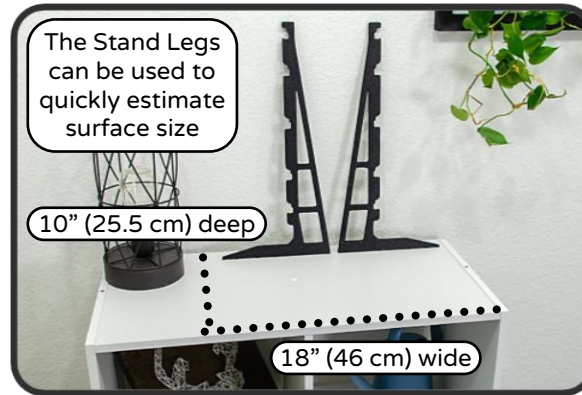

PotPerch™ Move – Installation and Use Instructions

Moving your PotPerch.

1. Your PotPerch Move can be quickly relocated with a little care
2. For the lowest-risk move, remove your plants and SipStations before relocation. SipStations are designed to be easy to remove and replace. It can take a little more time, but helps reduce the risk of dropped plants and spilled water!
3. **DO NOT lift your PotPerch using the Frame, Holders, SipStations, or the Stand Legs. Lift PotPerch Move by the Core only.**
4. Please use caution when moving your PotPerch. The weight and balance of your PotPerch will change based on the size of your plants and how you arranged them.
5. Please review the Cautions section of these Instructions before moving your PotPerch.

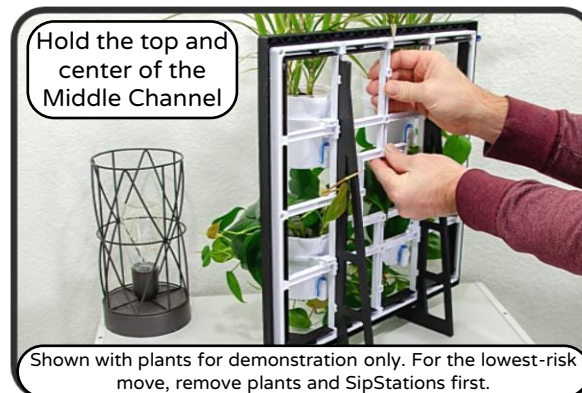

Prepare the Location.

1. The location for your PotPerch must be a level, flat surface with enough space above, to the sides, behind, and in front to easily fit your PotPerch and Stand..
2. Choose a flat surface that is at least 18 in / 46 cm wide and 10 in / 25.5 cm deep so there is room around your PotPerch.
3. Above the flat surface you will need empty space at least 18" (46 cm) wide and 18" (46 cm) high.
4. Your surface must be able to support the fully loaded PotPerch and Stand, including water, wet soil, plants, and any other items on the same surface. Review the Cautions section of these instructions for PotPerch Weight Limits.
5. Avoid sources of heat and cold that exceed the specified temperature range, as these temperatures may damage your PotPerch Move.
6. Plants can be messy, so the base of the PotPerch Stand is raised slightly. This reduces the risk of moisture getting trapped under the Legs. Use a water-resistant surface and always clean any spilled water promptly.

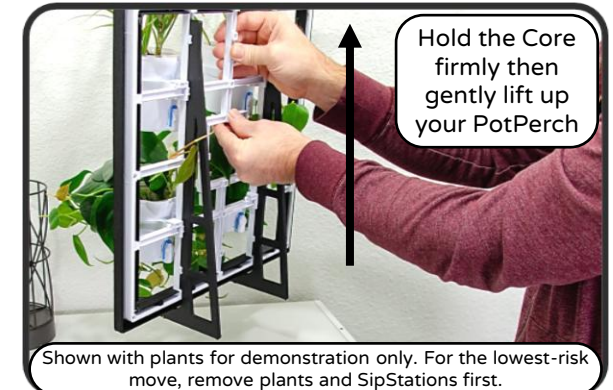

Ready, Grip, Go

1. **If you cannot easily rotate your PotPerch, remove your SipStations so you can easily hold the front of the Core.**
2. On the flat surface your PotPerch is currently placed on, and without lifting your PotPerch, hold a part of the Core and slowly rotate your PotPerch until you can reach behind and access the middle of the back of the Core with both hands. *If the Stand Legs catch, shift, or any PotPerch parts begin to loosen, stop rotating and remove your SipStations and plants.*

3. From the back of the Core, hold the top and center of the Core with both hands. Holding these two points gives you the most control to maintain the balance of your PotPerch.

4. Slowly lift your PotPerch to understand how it is balanced and if there are loose parts. If parts start to come loose, stop lifting, put your PotPerch down, remove your SipStations and plants and reattach the loose parts.

5. Holding the Core, slowly carry your PotPerch Move to its new location and place it on the surface with the plants facing away from you.

6. Holding the Core, slowly rotate your PotPerch until it faces the desired direction.
7. Check the Frame, Holders, SipStations (if present), and the Stand Legs have not come loose. Replace the SipStations, if you have removed them.
8. Your PotPerch Move now has a new home.
9. Brilliant! You are done.
